Who am I?

PartyLite® Petite Fragrance Flame™

What am I?

Powerful fragrance and ambience

Why am I right for you?

Instant fragrance with mesmerizing flame

Introducing **Petite Fragrance Flame™**

PARTYLITE®

Overview

Benefits

- Powerful immediate fragrance
- Large flicker flame

Reason to Believe

- Revolutionary patented wax and flame combination delivers stronger and faster fragrance than any other indoor candle
- Leaves no wax residue, no mess, no clean up

Features

- Iridescent glass sleeve magnifies the flame and gives the illusion of multiple points of light
- Glass sleeve and ceramic base remain cool to the touch
- Burner self extinguishes when wax is consumed
- Includes snuffer to extinguish flame
- Includes 1 wick and 2 replacement wicks for 100 hours of burn (3 wicks total for 300 hours of burn)
- Uses specially formulated Wax Melts in four Best-Selling Fragrances
 - New Wax Melts come in a 12-piece tray
 - Each Melt lasts for up to 50 minutes

Stories

- Worldwide premiere of this exclusive, patented system
- A PartyLite® first-to-market exclusive

Petite Fragrance Flame™
PARTYLITE®

Fragrance redefined

OUR Fragrance Flame™ Petite Wax Melts are unique in every way.

- Deliver powerful instant fragrance
- New Wax Melts come in a 12-piece tray
- Each Melt lasts for up to 50 minutes

Available in four of our bestselling fragrances

Fig Fatale

Irresistible blend of sensual fig, succulent fruits and velvety vanilla is deliciously rich.

Sun-kissed Linen

The powdery freshness of crisp linens is romanced with a musk of jasmine, lily, water flowers and citrus.

Marshmallow Vanilla

Marshmallow melts into whipped vanilla with a caramel drizzle and sugarcane topping for a familiar sweet treat

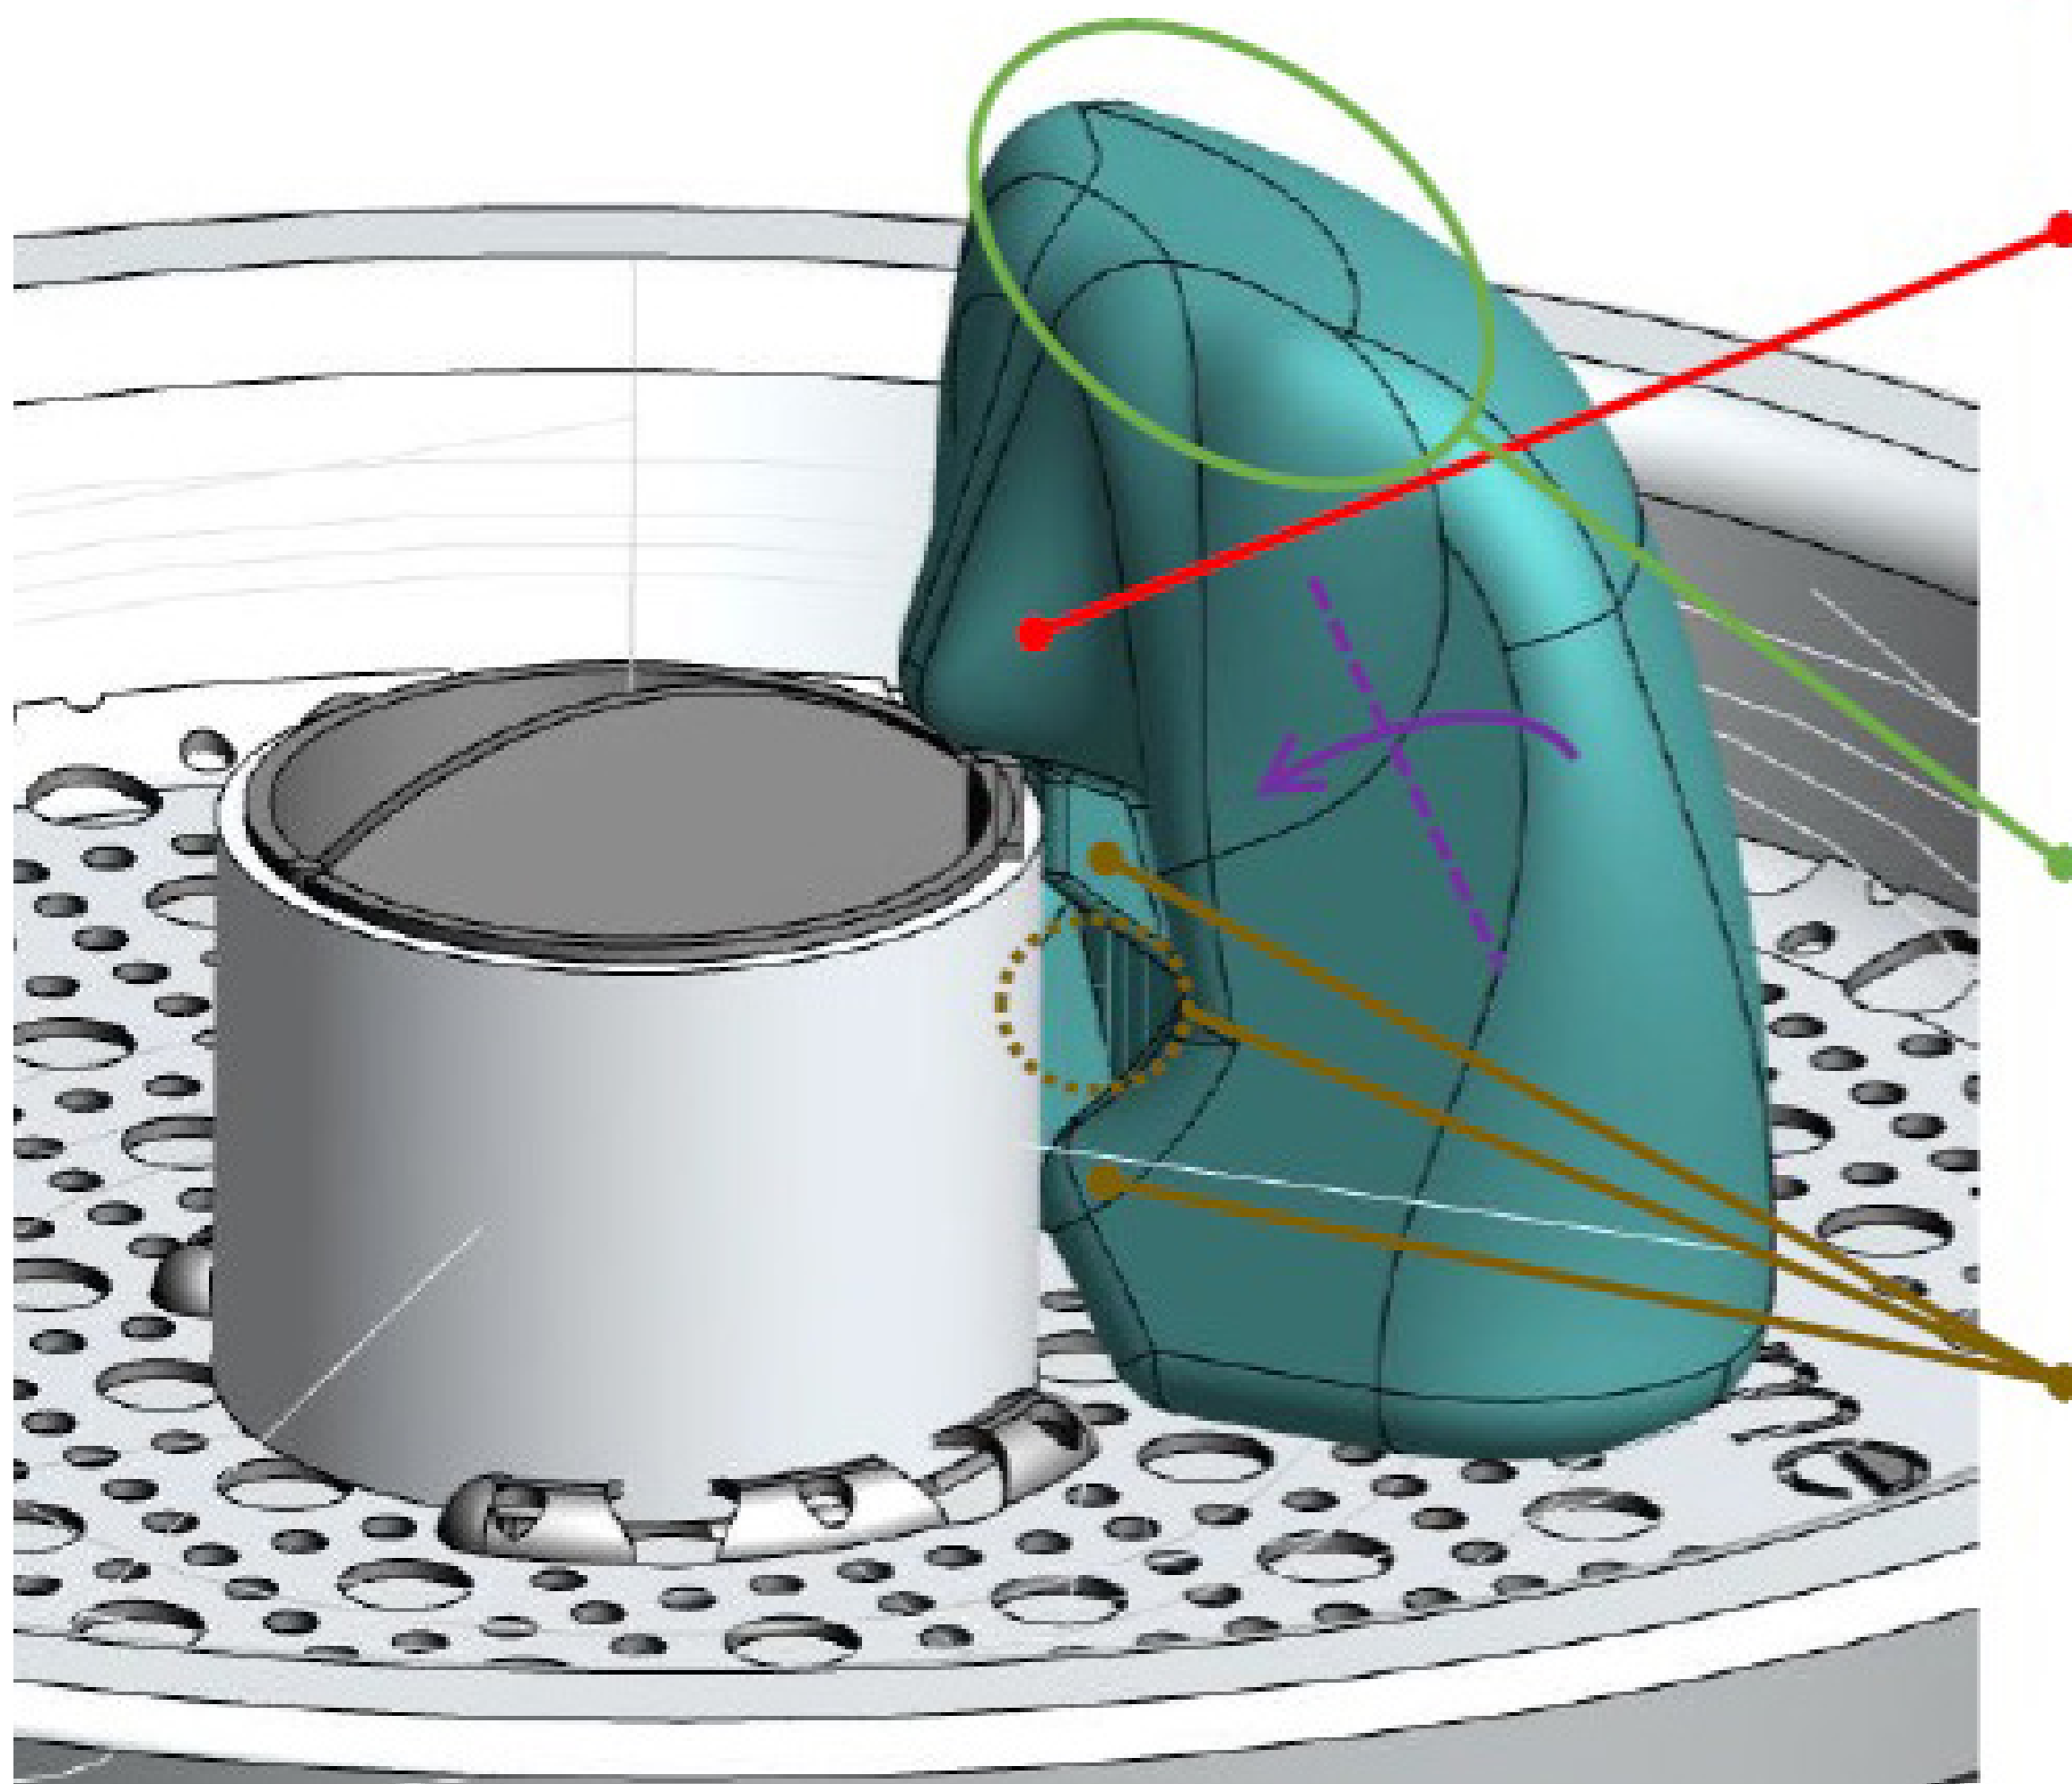

Mulberry

Tart black currant, sweet black berry, juicy mulberry and jewels of pomegranate are blended for a perfect berry twist.

Innovative design

Priming section

The solid/formed refill will require a “nose” to interface near the bridge to enable easy and reliable ignition. It is designed to get the system started and begin melting the Stoking Section.

Stoking section

The part of the solid/formed refill extending above the burner is melted by the initial flame, flows toward the burner, and continues to fuel the system from above and below until the complete burner is operating above the melting point of the wax.

Radial gap

The prongs here reliably position the refill and create a melt flow channel to help avoid flooding the primed wick at the onset.

Centre of gravity

The design of the body of the refill ensures the wax falls towards the flame - providing for faster melt of the whole refill.

There is a balance between the priming and stoking sections. This provides enough fuel to avoid starving the flame, and meters the flow of melted fuel to avoid flooding the flame. Once the system is sufficiently heated and the fuel surrounds the base of the burner, the remainder of the wax will burn without issue.

Petite Fragrance Flame™

PARTYLITE®

Easy to use

Step 1

Choose your fragrance

- Place 1-3 Petite Fragrance Flame Wax Melts on the grate, in contact with the wick assembly
- Be sure the wick is placed with the jagged edge facing upwards for lighting
- Be sure to set the “nose” of the Wax Melts over the wick assembly

Petite Fragrance Flame™

PARTYLITE®

Easy to use

Step 2

Ignite

Use a wand lighter or long fireplace match to ignite. Light from the top, touching both the wick and one of the Petite Fragrance Flame Wax Melts. Hold lighter in place long enough for some of the wax to melt and a flame to appear on the wick. Then enjoy hours of fabulous fragrance indoors/outdoors.

Step 3

Extinguish

When you're done, use the included Snuffer to extinguish the flame. Be careful not to touch the glass cylinder or the unit until it cools.

FAQs

Can I use Scent Plus® Melts in the Petite Fragrance Flame?

No. We designed the Petite Fragrance Flame™ Wax Melts specifically to be used in the Petite Fragrance Flame accessory for optimal performance.

Can I use a competitors Melts in the Petite Fragrance Flame?

No. We designed the Petite Fragrance Flame™ Wax Melts specifically to be used in the Petite Fragrance Flame accessory for optimal performance.

Can I use Petite Fragrance Flame inside?

YES! The Petite Fragrance Flame was designed, and safety tested, for both indoor and outdoor use.

If using outdoors, please bring it inside when you are not using it.

Where can I place the Petite Fragrance Flame for indoor use?

Use your Petite Fragrance Flame on any tabletop or fireplace mantle. Be sure it sits a half meter (18") or more below the ceiling or shelf.

How long does each wax melt last?

Each Petite Wax Melt will last approximately 50 minutes.

How will I know when it is time to replace the wick?

When the flame is very low and fails to melt all the wax.

How many melts do I use at once?

You may use as few as 1 Petite Wax Melt or as many as 3 at one time.

FAQs

Can I get replacement wicks?

Yes, replacement wicks are available and sold in packs of 3 (P93464.) Each wick will last 100 hours.

Why won't my wick re-light?

If you are having trouble relighting , simply use your lighter to melt some wax from the melts on to the wick.

How do I extinguish the flame?

Without touching or moving the glass cylinder, use the included snuffer to extinguish the flame.

Why did my flame self extinguish?

The flame will self-extinguish when the Petite Wax Melts are completely consumed. This is when you should add new melts and relight.

Can I leave the Petite Fragrance Flame outside?

We recommend bringing the Petite Fragrance Flame indoors after each use.

How do I clean the Petite Fragrance Flame?

Clean with a soft dry cloth. Glass cylinder may be hand washed with dish soap and water. Dry thoroughly.

Discontinue use if glass cylinder becomes chipped or scratched.

Do I need to add new melts each time I relight?

No, simply relight next time you are ready to use. You may need to hold the flame to the wick for a little longer when relighting.

Shortly after lighting the melts will not be visible. Even if you cannot see the melts there may still be wax remaining in the unit.

FAQs

How do I change over to a different wax fragrance?

Once the prior fragrance is used, simply add the new fragrance of your choice.

How do I remove the wax and clean the parts?

We recommend using all the wax before taking apart to clean. Parts can be cleaned using warm water.

Will the glass be too hot if I touch it?

The unit has been designed to function at a safe temperature, but we recommend letting the unit cool down before directly touching it.

Are there replacement parts?

The wicks are available as replacement parts. They are sold as a set of three (P93464).

“World’s fastest fragranced candle” – How fast?

Once lit you will experience immediate powerful fragrance.

Can I use my Petite Fragrance Flame without the spacer ring?

No, use only as the directions in the assembly instructions state.
